In the original publication of the article, Pbr should be replaced with Pb in Table 2. The correct Table 2 is provided in this article.

Table 2 Results of isotope study of monazites from charnockitic syenite, sample 8–2078

The common lead correction is done according to Stacey and Kramers (1975) for the age of 2030 Ma. Fractions: 1–2 – light yellow water transparent with rounded contours and a smooth shiny surface, doughnut-shaped and elliptical; 3–4 – the same as 1–2, but slightly darker; 5–6 are yellowish-brown, transparent, slightly darker than 3–4
